Kurabo released “PI-480 / NA-480” as a new product of GenePrepStar family

KURABO Industries Ltd launched new product of PI-480 and NA-480 as parts of its “GenePrepStar” family, which features fully automation DNA isolation system.

PI-480 enables DNA isolation from bacterial sample, plant, animal tissues and so on.

NA-480 is suitable for DNA isolation from maximum 7ml whole blood sample.

Both of the machines have built-in centrifuge and it makes possible the fully automated process from cell collection to precipitation and hydration of isolated DNA.

Business succession regarding Fujifilm’s Quick Gene products to Kurabo.

KURABO Industries Ltd and FUJIFILM Cooperation are please to announce that today, November 28th 2011, the two companies reached a definitive agreement of business succession regarding the Fujifilm’s Quick Gene products to Kurabo. The transaction close on Dec 1st 2011.

Life science research has advanced rapidly in recent years with the advent of tools for genomic research. The use of life science instrumentation and new chemistry in bioscience research is growing, and the demand for new and innovative technologies is expanding.

In 1990, Kurabo released their first products of DNA extraction robot PI-100. Since then, Kurabo has utilized its chemical and robotics for fully automation system.

Fujifilm launched the DNA extraction system in 2004. Fuji has utilized its membrane technology to extract DNA.

We are confident that Kurabo and Fujifilm’s technologies are a great fit and this business succession will bring an innovation for nucleic acid research and diagnostic field.

If you have any questions, please contact to bio@ad.kurabo.co.jp.
